3. If a project fails in the sense that it stops moving forward, it is likely because (Select all answers that may apply):

1 / 1 point

- ☑ There is insufficient interest in the wider community of developers

☑ There are not enough developers contributing

☑ Leadership is poor

☐ It is just too hard to start a new project

4. Which statement is true?　　　　　　　　　　　　　　　　　　1 / 1 point

🔘 A project should have a clear license to begin with. It may possibly make a change later if it really needs to, but that is often non-trivial if there are quite a few contributors

⚪ A project can start without a clear idea of what license to follow, and it can adopt it later, as needed

5. Most open source projects fail in the sense that they stagnate and fade away. Is this bad?　　　　　　　　　　1 / 1 point

🔘 It is **not** bad. Many seeds are planted and only some bloom, and it is difficult to predict which ones. It is always good to encourage a lot of new ideas and methods, and let them compete until the winners emerge.

⚪ It is bad. It is a waste of time and effort that could be better spent.

✓ Correct
Trying a new project is important, it is hard to tell the future
