✓ **Correct**
SUSE is an Enterprise Distribution

☐ Solaris

4. Which of the following are important facilities Linux distributions provide?

1 / 1 point

☑ Make it easy to install Linux on a wide variety of hardware platforms

✓ **Correct**
Install is much easier than it used to be.

☑ Form the connecting bridge between end users and upstream developers, making sure each is aware of the other's situations

✓ **Correct**
They help developers improve products and make users' voice be heard.

☑ Provide updates, upgrades and bug and security fixes to end user systems in a timely and controlled fashion

✓ **Correct**
Keeping up-to-date is a critical task.

☑ Make sure all the different software on the system works together and is updated at once without conflicts

> ✓ **Correct**
> Keeping all products in harmony is difficult and critical.

5. Select all true answers:

☐ Linux is one of the many varieties of the UNIX operating system.

☐ Linux is a product of the Free Software Foundation GNU project.

☑ Linux borrowed heavily from basic UNIX features, but is not actually an implementation of the UNIX operating system.

> ✓ **Correct**
> UNIX is in the historical foundations of Linux.

☐ The development of Linux is determined by The Linux Foundation.

☑ The term Linux really applies only to the core kernel, not the entire operating system.

> ✓ **Correct**
> There are many other non-Linux components to the operating system.
